## Health Team

## Meet Your Doctor

I was born in Ankara in 1974. I graduated from Hacettepe English Medical School and specialized on obstetrics and gynecology at SSK Etlik Maternity Hospital. I got my 'In Vitro Fertilization' certificate working at the IVF clinic of Etlik Maternity Hospital.

I worked as chief of the clinics and administrative officer at University of Health Sciences, Zekai Tahir Burak Maternity Hospital and Gulhane Training and Research Hospitals. After finishing 22 years of public service as a senior professor in 2021, I decided to start practicing in my own clinic.

In addition to my practice, I have more than 70 publications in national and international scientific journals. Along with many scientific publications, I supervised 14 specializations and worked as a member of Ethics Committee in many hospitals.

I still work as a reviewer in many scientific international journals, assistant editor in two national journals and used to be a member of the Ethics Committee and the second president of the Ankara branch of the Turkish Society of Gynecology and Obstetrics. I have an internationally approved genital aesthetic certificate from England. I am current Vice President of TIVAK Foundation.

I am married and mother of 2 children.
